Our illustration shows the 5 Deutsche Mark coin issued in memory of C.F. Gauss in April 1977.
More about this and competing designs you will find in the pilot issue August 1977-Volume, page 4

The new Mathematical Intelligencer

Managing Editor: * * *
Consulting Editors: Bruce Chandler, New York
Harold Edwards, New York
Book Review Editor: * * *

The new **Mathematical Intelligencer** is a journal that will publish material relevant and useful to every mathematician.

Like its predecessor, it will contain contributions from all branches of mathematics as well as information and news of interest.

The journal will approach mathematics as a homogeneous subject; every issue will contain one or more survey articles, informing mathematicians doing research work of progress in other branches of the discipline and enabling those working in industry to keep in touch with new developments. It will also offer a forum for the discussion of any other topic of interest to mathematicians, such as regional, historical, or classroom aspects of mathematics, and provide general information (e.g. on upcoming congresses) and book reviews.

Subscription Information:
Volume 1 (4 issues) will appear in 1978. Sample copy available upon request.
